Description

A lab result in eVACDOC SHALL contain at least one lab result declared in the element. Each lab result SHALL consists of a code and the according test interpretation. Depending on the nature of the result a value MAY be indicated.

Code

For eVACDOC a value set of relevant lab results exists. The usage of the LOINC value set for notifiable pathogens and for lab results in the transplantation process of the FOPH is recommended but not conclusive.

Interpretation

The interpretation code indicates if an immunization exists (NEG) or not (POS).

Value

If a concrete value (e.g. titer) is required, it SHALL be recorded with UCUM units.
